

Grace Hassall – Biography

Hi, my name is Grace Hassall and I will soon be starting my third year at Harper & Keele Veterinary School. I'm particularly interested in the role that vets play in contributing to environmental sustainability; I hope to work in wildlife or exotics in the future. In my free time I enjoy painting, anything else crafty or creative, and looking after my house plants. Thank you for taking the time to read my poster, and please get in touch if you have any questions regarding it!
